

Pass and Membership

Membership in Minutes!

The Pass and Membership module enables ticket sellers to issue full color passes and collect contact information right at the point of sale. Pass holder or member information is saved directly in an easy-to-search database. Photo Pass integrates seamlessly into Galaxy Point of Sale, and its built-in, customizable features provide the flexibility you need and the convenience your customers want.

- **Create New Memberships On the Spot**

Produce new memberships at your front desk immediately. Shoot, store, view and print pass holder photos.

- **Instantly Print Personalized, Souvenir - quality ID Cards**

Membership cards can be printed right at the point of sale. Use paper, plastic coated paper, or plastic ID cards with a color or black and white photo. You choose the option that best fits your budget.

- **Enter and Manage Data More Efficiently**

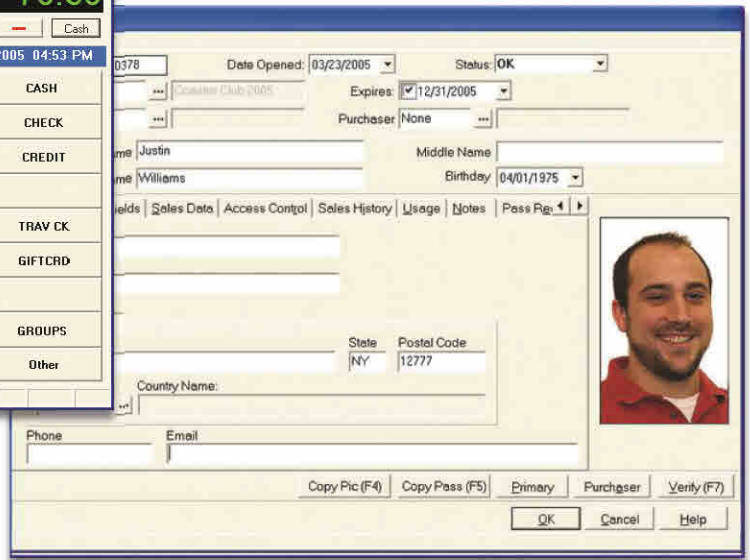

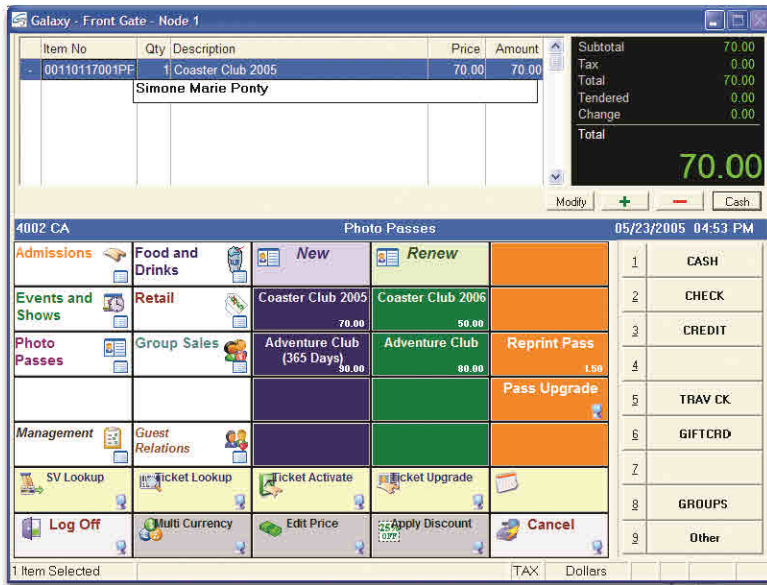

No need to enter membership data multiple times in multiple databases. Data entered into Galaxy is automatically synchronized with The Raiser's Edge®.

- **Quickly Validate A Membership at Any POS**

With a member photo ID stored in the member record, you can validate a membership at a glance, from any POS station located at your facility.

- **Easily Track Pass Usage**

Reports identify pass activity like pass sales, usage, and contact information. Use the data compiled in reports to run promotions, or to notify members when it's time to renew.

Supports Different Media - Paper, Plastic, Cards

- Print personalized, souvenir-quality cards or tickets on paper, plastic coated paper, or plastic ID cards
- Black and white or color Photo IDs
- Cost effective solutions based on budget requirements
- Graphical card layout
